

**Amendments to the Claims:**

A listing of the entire set of pending claims (including amendments to the claims, if any) is submitted herewith per 37 CFR 1.121. This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Previously presented) Method of presenting a document, the document being comprised within a collection of documents that can be presented to a user, the method comprising:

requesting by the user for the document to be presented;

determining if the document is present within a sub-collection of the collection, the sub-collection comprising those documents, of the collection of documents, that are allowed to be presented to the user, wherein the sub-collection of the collection is determined based on an application located on an information carrier;

presenting the document to the user if the document is present within the sub-collection.

2. (Original) Method according to claim 1, comprising reading the sub-collection from a location.

3. (Previously presented) Method according to claim 2, wherein the location is one of [[an]] the information carrier, an internet site or a broadcast station.

4. (Original) Method according to claim 2, comprising:

playing an interactive presentation from the location; and

continuing playing the interactive presentation if the document, that the user requested, is present within the sub-collection comprising those documents that are allowed to be presented to the user.

5. (Original) Method according to claim 2, wherein the location comprises a reference to the sub-collection.

6. (Previously presented) System having at least one processor for presenting a document, the document being comprised within a collection of documents that can be presented to a user, including:

determining means conceived to determine if the document is present within a sub-collection of the collection, the sub-collection comprising those documents, of the collection of documents, that are allowed to be presented to the user, wherein the sub-collection of the collection is determined based on an application located on an information carrier; and

presenting means conceived to present the document, that the user requests to be presented, if the document is present within the sub-collection.

7. (Previously presented) System according to claim 6, comprising:

reading means conceived to read the sub-collection from [[an]]the information carrier; and

playing means conceived to continue playing an interactive presentation if the document, that the user requested, is present within the sub-collection comprising those documents that are allowed to be presented to the user.

8. (Previously presented) Media player comprising the system according to claim 6.

9. (Previously presented) Information carrier for use in the media player according to claim 8, the information carrier comprising an interactive presentation and a sub-collection comprising those documents that are allowed to be presented to a user.

10. (Previously presented) Computer-executable program product embodied on a computer readable medium for enabling a computer to perform the method according to claim 1.
